GENERAL REMARKS ON THE MONTH.

Collected in bottle 1·196 inch
Sum of separate readings 1·181 "
·015

Slight unmeasurable amounts of Rain fell on 8 days & therefore 1·196 is the more correct figure

N.B. The afternoon showers that occurred on the 30th inst were very local. About half a mile to the South of my house the surface earth at about 7pm was powdery dry & the grass very slightly wet.

Max. temp. in shade ° on the
Min. " " " ° on the
Temp. in shade, at or below 32° on days.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

JAN 1911

Kept at Kingsclere

in the County of Hants 9

by Dr Rev Maples

RAIN GAUGE
Pattern Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground ft. 3 in.
" " " Sea Level 327 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Kingsclere
Distance 1/4 Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A.
BRITISH RAINFALL.

5 - MAR 1910

Kept at Berry Grove - West Liss

in the County of Hants

by Ernest Latter

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 250 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name LISS
Distance 1 mile Direction SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2. BRITISH RAINFALL.

5 FEB 1910

Kept at Mapledurwell

in the County of Hants ~~W~~

by H. B. Thorp

RAIN GAUGE
Pattern Symonds
Diameter of top 8 in.
Height of top above Ground ft. in. 0
" " " Sea Level ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Basingstoke
Distance 4 Mi. Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

3 JAN 1911

Kept at Milford House, Milford-on-Sea

in the County of Hants 4

by Ed. L. Agar

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 40 ft.

Time of Observation 9. a. m.

Nearest Railway Station
Name Lymington
Distance 4½ miles Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.

1 JUL 1909

REGISTER OF RAINFALL IN 1908

Kept at Royal Victoria Hospital, Netley
in the County of Hants
by Mr. E. Batchelor (Observer)

Rain Gauge
Pattern Pastorelli & Rapkin, London
Diameter of top 8 in.
Height of top above Ground ✓ ft. 4 3/8 in.
" " " Sea Level 34 ft.
Time of Observation 9 am.
Nearest Railway Station
Name Netley
Distance 3/4 mile Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

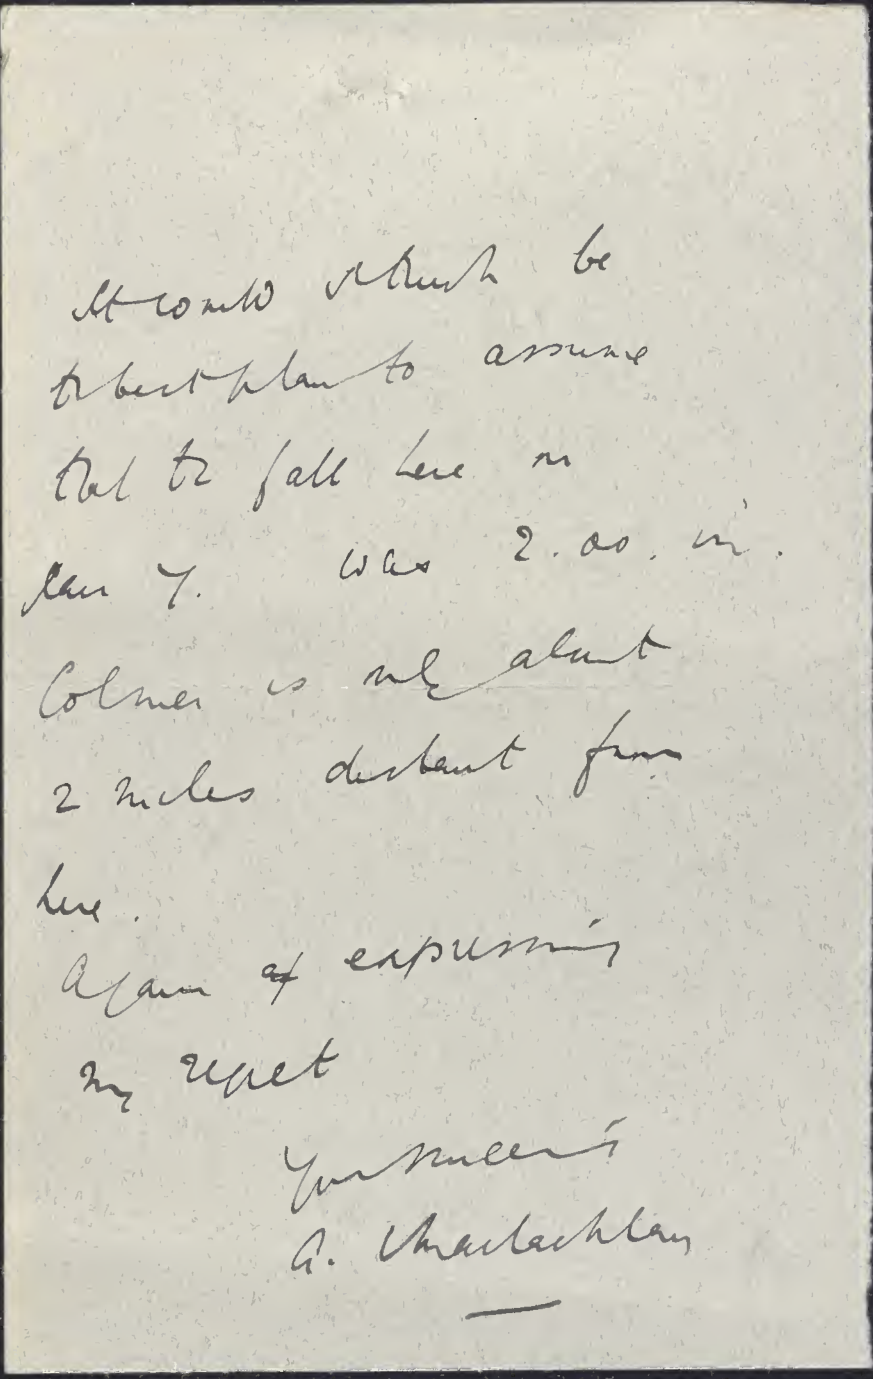
STATION, TISTED.
TELEGRAMS, SELBORNE.

NEWTON VALENCE VICARAGE,
ALTON,
HANTS.

June 8. 1909

Dear Sir

I am so sorry that no entry occurs in my rainfall return of the snowstorm of Jan 7. I was staying at Bournemouth at the time. I left my sister to enter the rainfall. & she was away in London on Jan 6. 7. & 8.



It would I think be the best plan to assume that the fall here on Jan 7. was 2.00 in. Colmer is only about 2 miles distant from here.

Again expressing my regret

Yours sincerely

A. MacLachlan

Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

in the County of Southampton 5
by Southampton Corporation

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 113 ft.

Time of Observation 9 am

Nearest Railway Station
Name Shawford
Distance 1½ miles Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

2 JAN 1911

Kept at Otterbourne

in the County of Hants

5

by G. Norsworthy

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft.
" " " Sea Level 137 ft.

Time of Observation 9 am

Nearest Railway Station
Name Shawford
Distance 2 Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A. BRITISH RAINFALL. 26 JAN 1911

Kept at Ovington Rectory Alresford

5

in the County of Hampshire

by Rev H. F. La M. Stowell

Rain Gauge: Pattern ……
Diameter of top …… in.
Height of top above Ground …… ft. …… in.
" " " Sea Level …… ft.

Time of Observation ……

Nearest Railway Station: Name ……
Distance …… Direction ……

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

	Distance	Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
17 JAN 1911

Kept at Noel Cottage Portchester

in the County of Hants 5

by R. M. Frost

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level ft.

Time of Observation 9 -

Nearest Railway Station
Name Portchester
Distance Direction N -

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL. 756

1 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Sherborne St John Rectory

in the County of Hants

by Rev D W Chute

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 2 in.
" " " Sea Level 367 ft.

Time of Observation 8

Nearest Railway Station
Name Basingstoke
Distance 2 Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

4 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Ashley Old Manor. Stockbridge
in the County of Hampshire
by Legh S. Powell

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 235 ft. approximately
Time of Observation 9 am
Nearest Railway Station
Name Horsebridge
Distance 3 m Direction about S.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2
BRITISH RAINFALL.

REGISTER OF RAINFALL IN 1909

Kept at Strathfieldsaye House Gardens.

in the County of Hampshire.

by A. G. Nichols.

Rain Gauge
Pattern Same as generally used by Gardeners
Diameter of top 5 in.
Height of top above Ground 1 ft. 8 in.
" " " Sea Level 165 ft. 8 in

Time of Observation 9 A.M.

Nearest Railway Station
Name Mortimer
Distance 3½ miles Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by Fredrick Wilkin

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 575 ft. Estd

Time of Observation 9am

Nearest Railway Station
Name Farnham
Distance 2½m Direction SSE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

-8 JAN 191

REGISTER OF RAINFALL IN 1909.

Kept at The Croft, Wickham Esca Rmg

in the County of Hants

by Miss C. L. Rashleigh

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 11 in.
" " " Sea Level 80 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Wickham
Distance ⅓ mile Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

719

COPY by B.R.O.

REGISTER OF RAINFALL IN 19~~2~~07.

Kept at Saint-Cross, Winchester
in the County of Hampshire
by A. F. Gotch

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
12 JAN 1911

Kept at Winkton Lodge - Christchurch

in the County of Southampton 3

by Miss Lassell

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 0 ft. 9 in.
" " " Sea Level 35 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Christchurch L&S.W.Rly
Distance 3 Direction SSW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
